TECHNICAL DATA SHEET

AAC GP+

Blend of preservatives to improve quality and preservation of raw materials and TMR

- Contains buffered propionic acid, in the form of ammonium di-propionate. Thanks to its special formulation, product is non corrosive, non volatile and non dangerous.
- Product is formulated with a high content of ammonium propionate, in order to improve handling of the product, to reduce volatility and corrosivity.

Especificaciones:

Ammonium propionate (1k284)	640.000 ppm
Propionic acid (1k280)	10.000 ppm
Carrier (Water)	

Chemical and physical data:

Form	liquid
Colour	Transparent to slighly yellow
Odour	Very little
pH (10% solution)	6,1
Solubility in wáter	All proportions
Density	1059 kg/m3 (20ºC)

Dosage:

- Grain preservation:

Moisture, %	Kg/Ton
<10	0,25
10-13	0,50
13-15	1,00
15-20	2,00
20-25	4,00

- TMR preservation: 0,5-1 Kg/Ton

Packaging:

- 25 kg Canisters, 220 kg Drums, 1050 kg IBC containers
